B.C.A from
Narayan College of Science and Arts (CSJMU)
(2019-2022 **)**

PROJECTS

Bhaasha

- Facilitated real-time communication by matching users with appropriate interpreters.
- Enabled booking of interpreters with specific details including language, date, time, location, and subject matter.
- Supported various modes of interpretation including in-person, video, and telephone sessions.

ERP Ecosystem

- ERP Ecosystem is an erp app to manage company employees .
- It combines user management, candidate hiring, interview scheduling, and project oversight.
- Simplifies the hiring process.

Oodles Dashboard

- Developed Oodles.Dashboard, a centralized platform for employee management.
- Provides tools for leave management, project tracking, feedback submission, meeting scheduling, and more.
- Simplifies daily tasks through a user-friendly interface.
- Allows employees to navigate leave schedules, monitor project progress, submit and receive feedbacks.

Portfolio Website   Git   View Live

- Build with Angular
- Fully Responsive
- Support Multiple themes
- Include a simple contact form
